

2-METHYL TETRAHYDROFURAN (2-MTHF)

CAS Number: 96-47-9

Other Names: 2-methyl Tetrahydrofuran; 2-Methylfuranidine;
Tetrahydro-2-methylfuran; 2-Methyloxolane Furan; 2METHF

Formula: C₅H₁₀O

PRODUCT INTRODUCTION

Methyltetrahydrofuran appears as a colorless liquid with an ether-like odor. It is less dense than water and vapors heavier than air. Used to make other chemicals and as a solvent.

PHYSICAL AND CHEMICAL PROPERTIES

Appearance	Colorless Clear Liquid
Purity	99.9 %
Water	0.016 %
Anti-Oxidant (BHT)	0.024 %

APPLICATIONS

- 2-Methyltetrahydrofuran is mainly used for making chloroquine phosphate, primaquine phosphate, etc. It is also used as solvent, such as substitute for tetrahydrofuran in Grignard Reaction, and also as a substitute for benzene, toluene, chloroform and other solvents. It is also widely used in the synthesis of spices, new materials and so on. It is also used in automotive fuel additive.
 - Solvents (for cleaning and degreasing).
 - Reaction solvent.
